Seed Varieties

44Y30RR Canola

Early-mid season Roundup Ready hybrid variety, with a wide area of adaption. Blackleg rating MR (resistance group AB). Tested in NVT in 2020-22.

Ballista Wheat

Ballista is an AH quality, quick to mid-maturing variety, similar to Mace but slightly quicker than Scepter, Ballista has high and stable yields across a range of environmental conditions, consistent with Scepter and Vixen. Released in 2020 (tested as RAC2598), bred and marketed by AGT.

Brumby Wheat

Brumby is a mid-maturing APW wheat variety. Development speed of this variety is best suited to early May sowings but evaluation in NVT is limited so far. Brumby offers good disease resistance to stem rust (MR) and powdery mildew but is susceptible to leaf rust (SVS). Released in 2022 (tested as IGW6683).
