

**February 2024
Trading Hours**
Monday - Friday
8.30am - 5.30pm

Need Fencing?
We have Stock available.

Inoculants

Some growers are planning to sow legumes this year and recognise how important it is to inoculate and increase your soil nitrogen levels.

We can order a range of inoculants such as:

- **BASF's *Nodulaid*** is a potent formulation, manufactured with a huge amount of rhizobia readily available for N fixation if sown into moisture.
- **BASF's granular inoculant, *Nodulator***, is an excellent option for dry sowing but this does need to be ordered early if you don't want to miss out! *Please let us know as soon as possible if you want some.*
- We also can order Bayer's granular and peat inoculants, ***TagTeam***, they are also a very high quality product however due to it being manufactured overseas supply is not as reliable or timely.
- ***Alosca*** are a well established, WA based, company that manufacture and develop their own Peat and Granular inoculants

BASF
The Chemical Company

Nodulaid
A potent inoculant for nitrogen fixation and nodule growth

Kept at **OPTIMUM TEMPERATURE** (as cold as your beer) in our cool room until you need to use it.

CARRS' SEEDS | 1-7 PHILLIPS STREET, CUMMINS
www.nrics.com.au | (08) 8676 2016

Here at Carrs' Seeds we store all of our peat inoculants in our cold room at the recommended temperature so you can be sure that you are getting a quality product that contains viable rhizobia.

Give us a call on 8676 2016 to discuss your legume inoculant requirements for the coming season.

We sell Tanks!

ANIMAL HEALTH

Carrs' Seeds wish you every success for the new year and coming season. We look forward to helping you achieve the best results with your farming, cropping & livestock programs in 2024.

Please contact Denis with your seed or fertiliser orders.

Introducing our new Employee: Raymond Whillas (Animal Health)

We are pleased to announce Raymond Whillas is joining our team here at Carrs' Seeds, from 5th February.

Raymond Whillas comes to us with more than 20 years experience in the Agricultural industry. He has worked with many clients from across the Eyre Peninsula, South East and South West Victoria.

Raymond's proudest moments are being with his wife Anna at the birth of all four Children, Silver, Zara, Ava and Austin. He has come back into the district to raise his family, on a nearby farm.

Raymond specializes in animal health and nutrition, he understands client values and livestock needs.

Understanding markets and consumers drives Raymond to help his clients to produce a premium product.

Under his recommendations, Raymond has seen proven results with stock weight gain and significantly increased lambing percentages under tough conditions, when the correct livestock nutritional and health needs are met at precisely the right time. Knowing what to use at each stage of your livestock production, Raymond is keen to help you gain the results that you are aiming for.

Feel free to have a chat to Raymond, when you are next in store about your sheep program.

BioStart Ruminant is a prebiotic digestion enhancer formulated to give stock a boost at important times such as joining, weaning and at feed changes.

BioStart Ruminant is powered by signal molecule technology. Ruminant contains a concentrated blend of enzymes and secondary metabolites from the fermentation of selected strains of digestive bacteria; *Lactobacillus acidophilus*, *Bifidobacterium* & *Streptococcus thermophilus*. BioStart Ruminant aids in maintaining efficient rumen function through periods of stress such as weaning, transport and feed changes by ensuring the right microbes dominate the gut.

- **Increases digestive efficiency** • **Reduces feed change stress** • **Reduces weaning stress**
- **Increases weaner weight** • **Increases fleece weight**
